

BOHO UNPLUGGED IN A TECH-FILLED WORLD

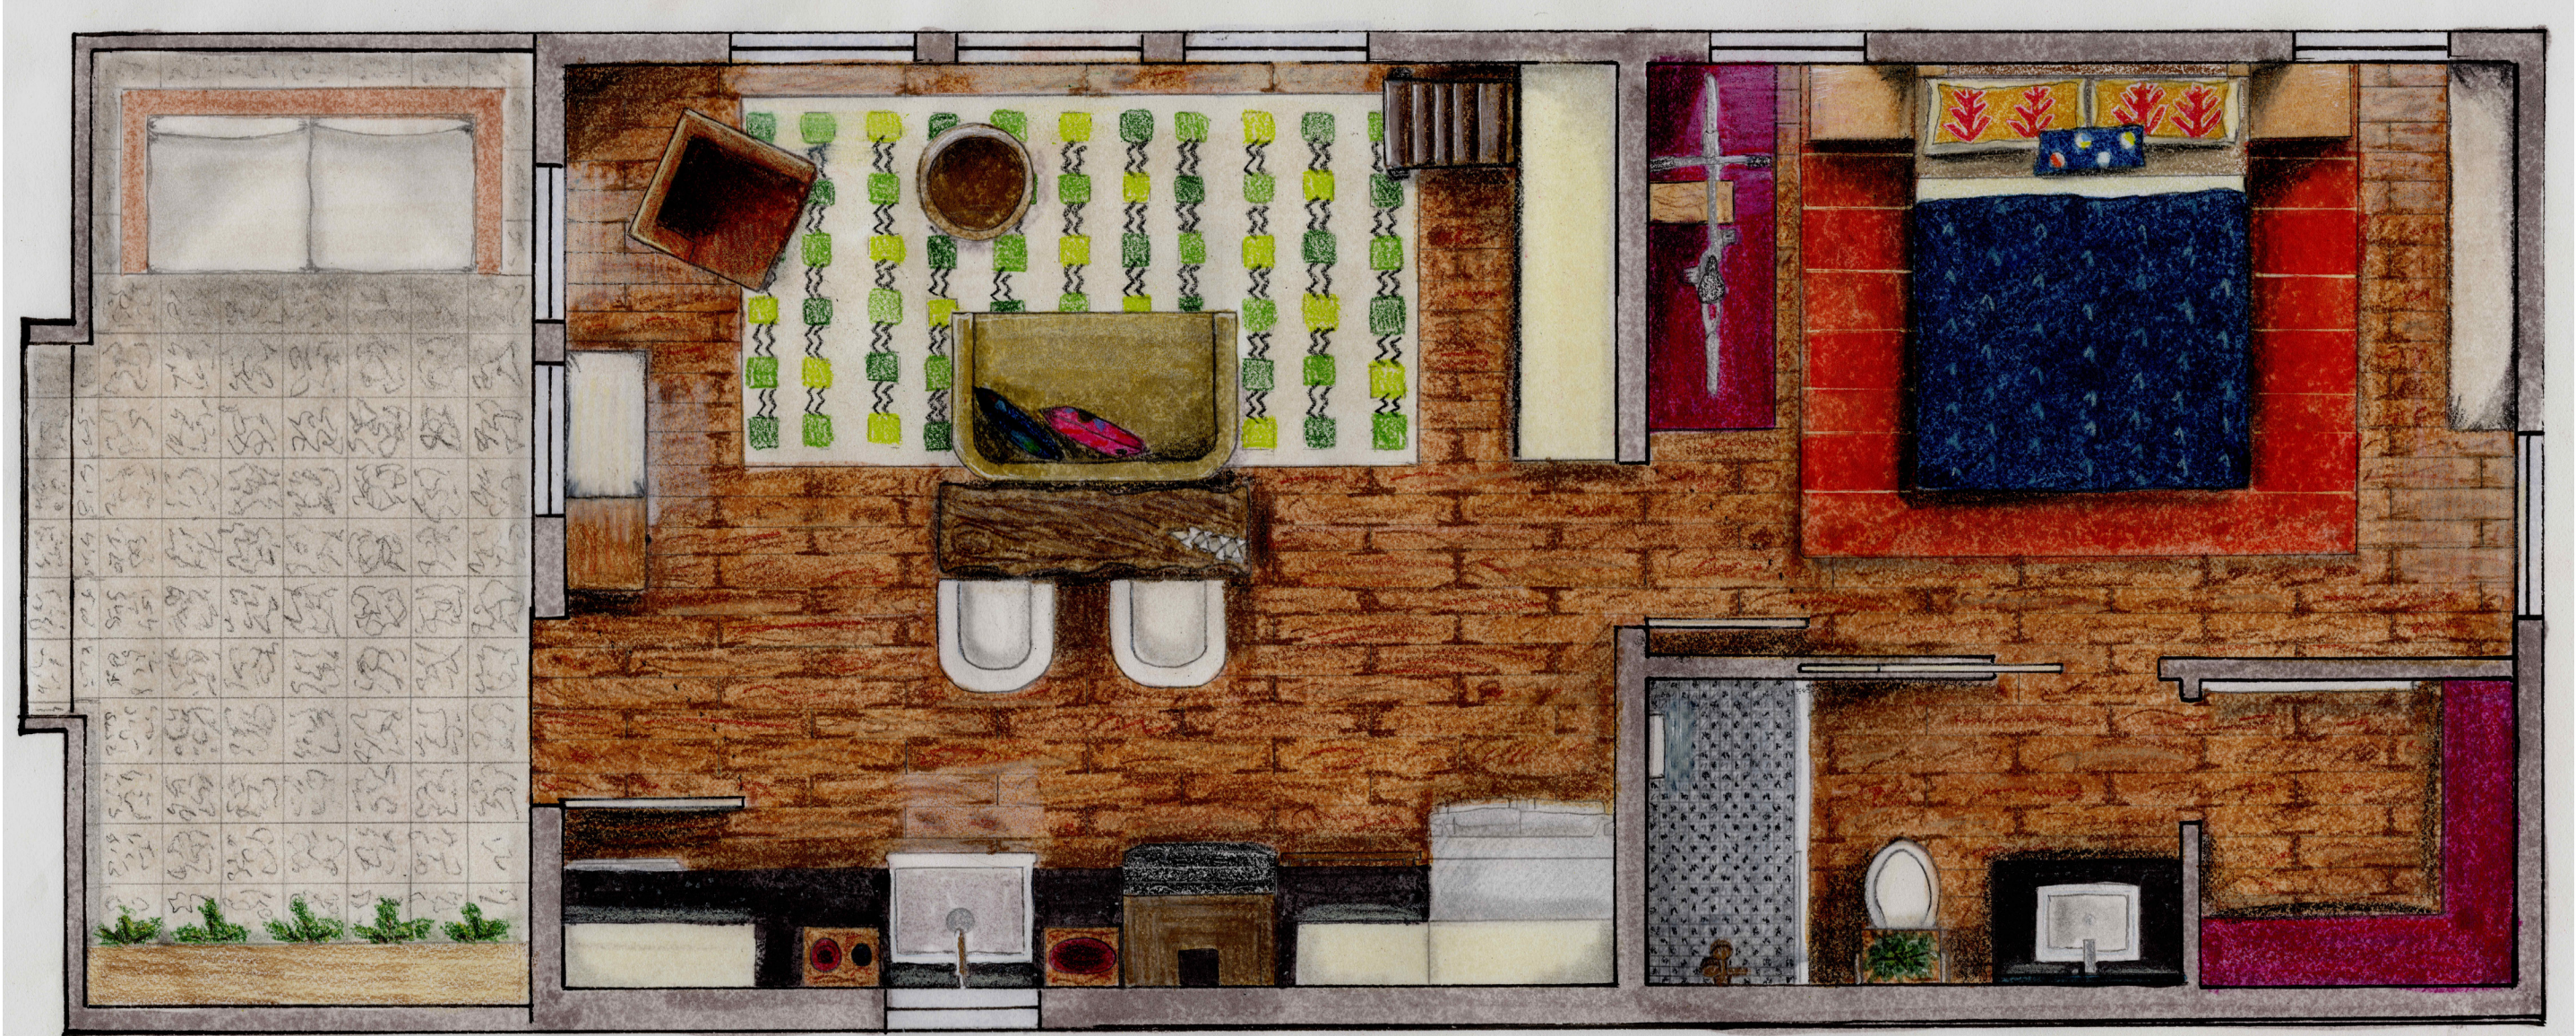

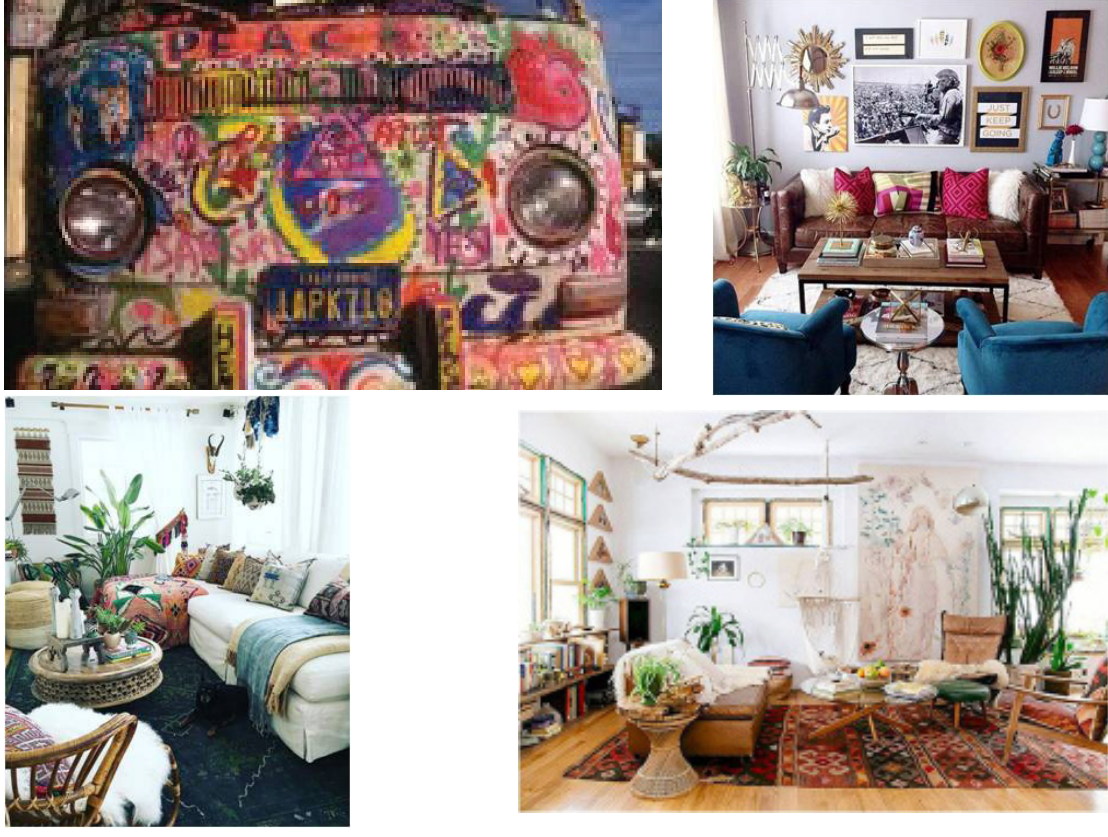

Concept:

- In a world where everything is data-filled and technical, Mark and Sara want a space that is unpredictable and has a mixture of textures, colors, and patterns.
- Mark and Sara stare at computer screens all day. When they come home, they want to unplug and unwind by enjoying nature around them, and a naturistic tiny home focused on the outdoors.
- Bringing their sense of outdoor adventure inside, this tiny home will incorporate storage for their hiking and biking equipment in creative and artistic ways.
- The tiny house will feature their love of cooking and music through bright features, staying true to the boho and “unplugged” look.
